How to use this pack

Read it once. Use it for a year.

Every prompt in this pack is a **fill-in-the-blanks template**. Words inside [BRACKETS] are the parts you replace with your own details. Everything else stays the same — and that's the point.

Step 1 — Pick the prompt that solves today's problem. Don't read the whole pack in one go. Pick the section that matches what you need right now (studying, writing, freelancing, content, or career).

Step 2 — Replace the [BRACKETS] with real info. The more specific you are, the better the output. 'Help me with my resume' gives a generic answer. 'Help me tighten the Experience bullet for my marketing internship at Zomato' gives you something usable.

Step 3 — Iterate. The first output is a draft, not the answer. Read it, ask the AI to fix the 1 thing that's off, and repeat. The 3rd version is almost always the one you'll actually use.

Step 4 — Save your winners. When a prompt gives you a great result, save the exact wording you used. Over time, you build your own private library of prompts that sound like you.
